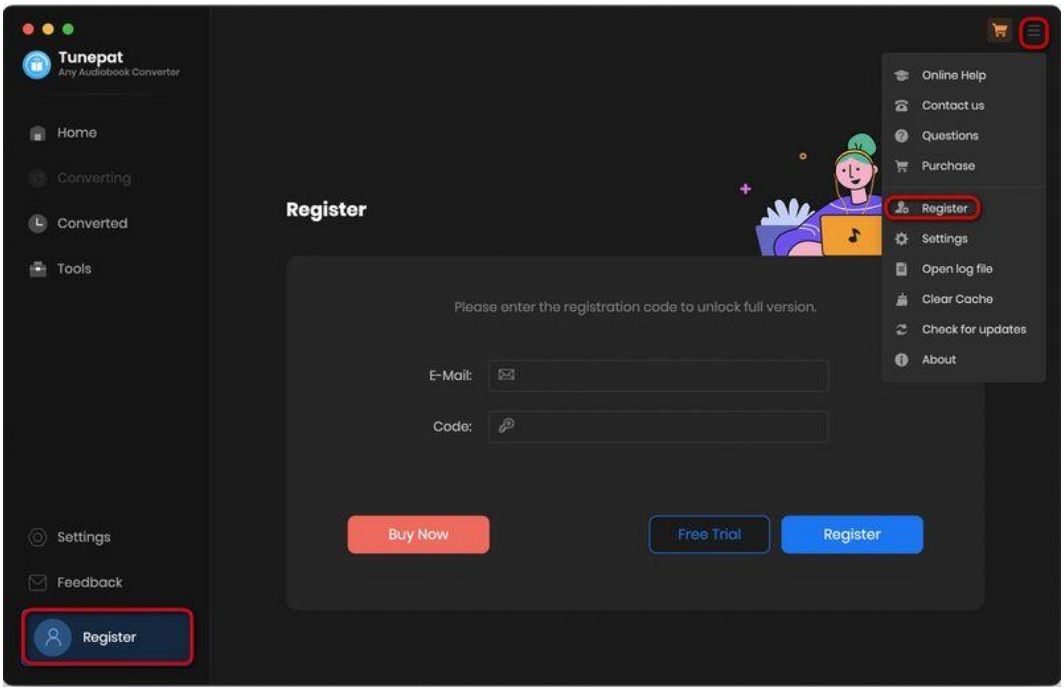
Register TunePat Any Audiobook Converter for Mac

Step 1: Run TunePat Any Audiobook Converter on Mac. Then select the "☰ > **Register**" option or directly tap on the "**Register**" button on the lower left corner of the toolbar to find the registration box below.



Step 2: Copy and paste the registration **Email** and **Code** you received into the registration pop-up window, then click “**Register**” button.

Step 3: Once finishing the Registration process, the limitations of the trial version will be removed.

TIPS:

1. We suggest you simply copy & paste the Registration information into the pop-up dialog.

2. Make sure both Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click "**Buy Now**" to finish the payment and get the license.

3. Please make sure the Registration Email and Registration key you entered are complete, and do not insert any blank before or after them. Otherwise, normal registration will not be possible.

4. The license is **not shared between Windows and Mac**, and a license key can only be used on one device.

5. If you need to replace the computer, please contact the TunePat customer service team by email to help you deal with it. If you register and use on multiple devices at the same time, the registration code will become invalid and you cannot register successfully.

6. In the case of subscription renewal, then complete the registration by these steps: Click on the "**Register**" option → Choose "**Renew License**" → Enter the E-mail and the new code you have received on the renewal date. → Tap on "**Confirm**".

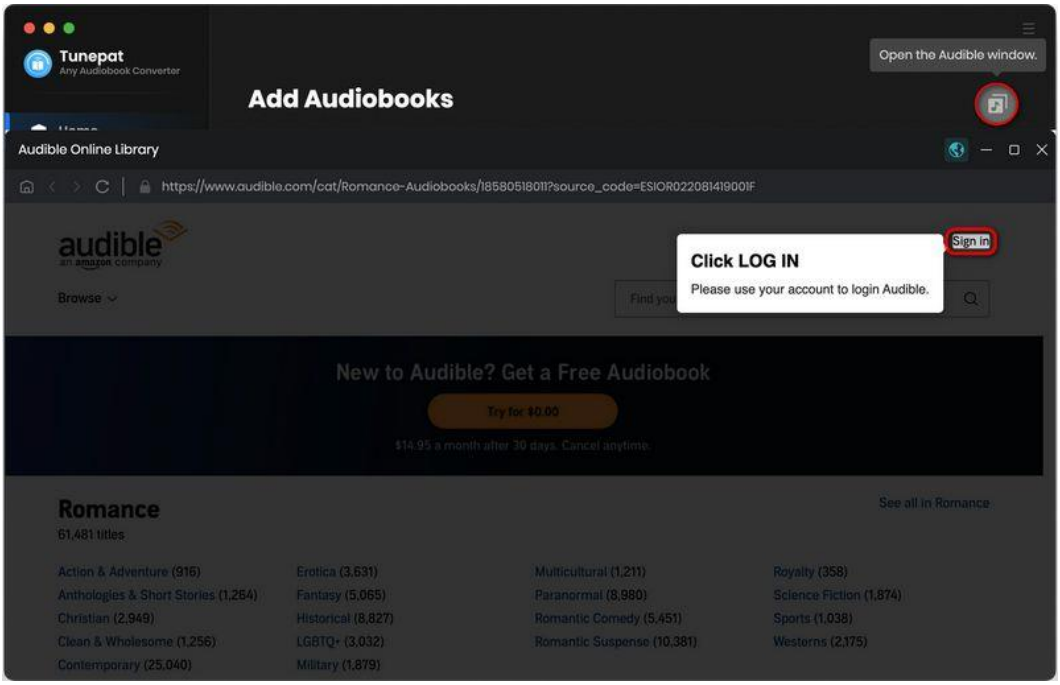
Convert & Download Audiobooks from Audible Library to Mac

Step 1: Log in to Your Audible Account

Initiate TunePat Any Audiobook Converter on your Mac to prompt the automatic appearance of the Audible Online Library window. Alternatively, manually access this window by selecting the "**Open the Audible window.**" button on the Home interface. Proceed by clicking the "**Sign in**" button and entering your credentials for your Audible Free/Plus/Premium Plus account.



Step 2: Add Audiobooks to TunePat for Conversion

Upon successful login, open the desired audiobook for conversion. Utilize the blue "**Click to add**" button on the lower right side, prompting TunePat to identify and list all titles on the current page in a pop-up window. By default, all titles are selected, but you have the option to manually choose specific ones before clicking "**Add**" to include them in the Home interface for subsequent conversion.

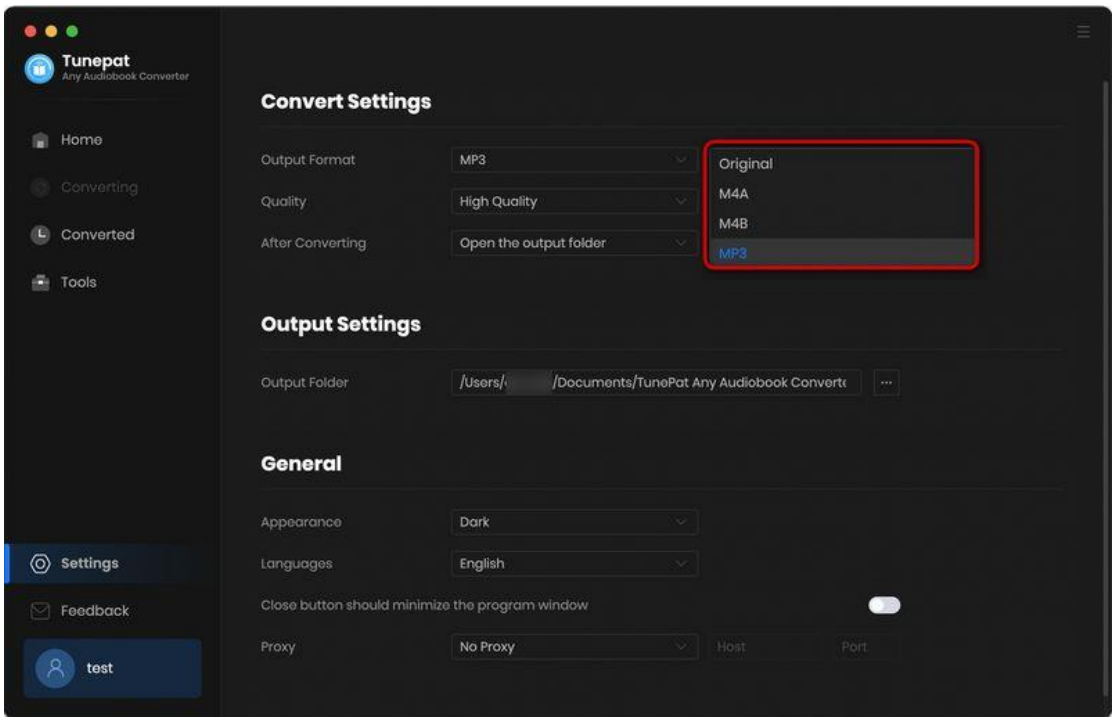
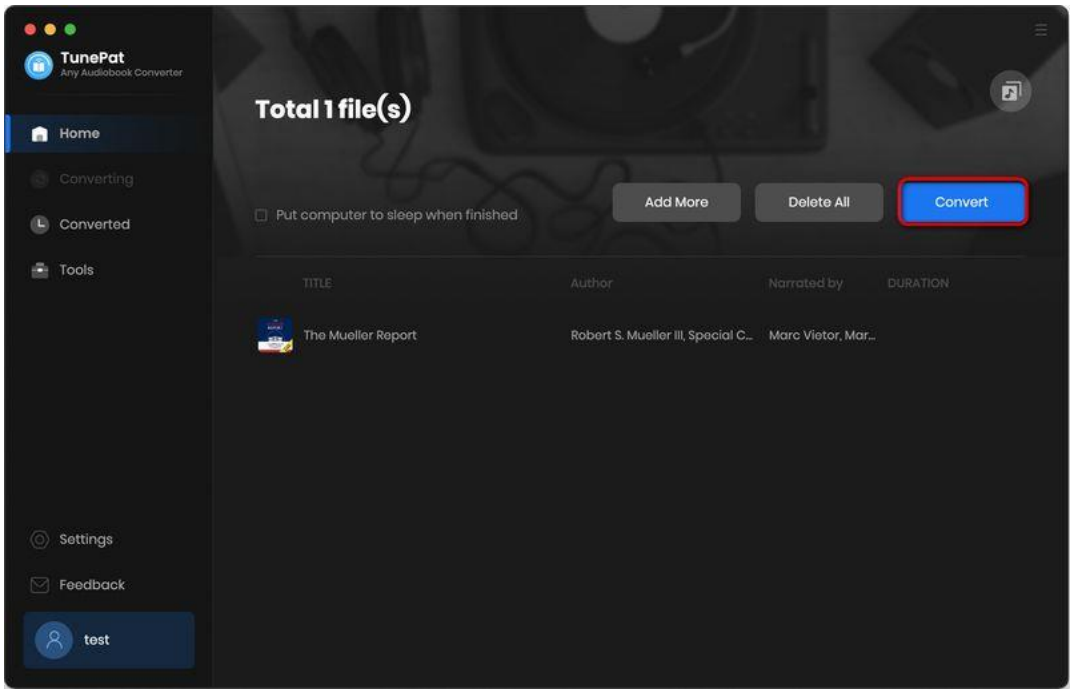
Step 3: Finish the Output Settings

Prior to initiating the conversion process, customize the output parameters by navigating to the "**Settings**" tab on the lower left side. Options for modification include output format (**Original/M4A/M4B/MP3**), quality (**High Quality/Small Size**), output folder, and more.



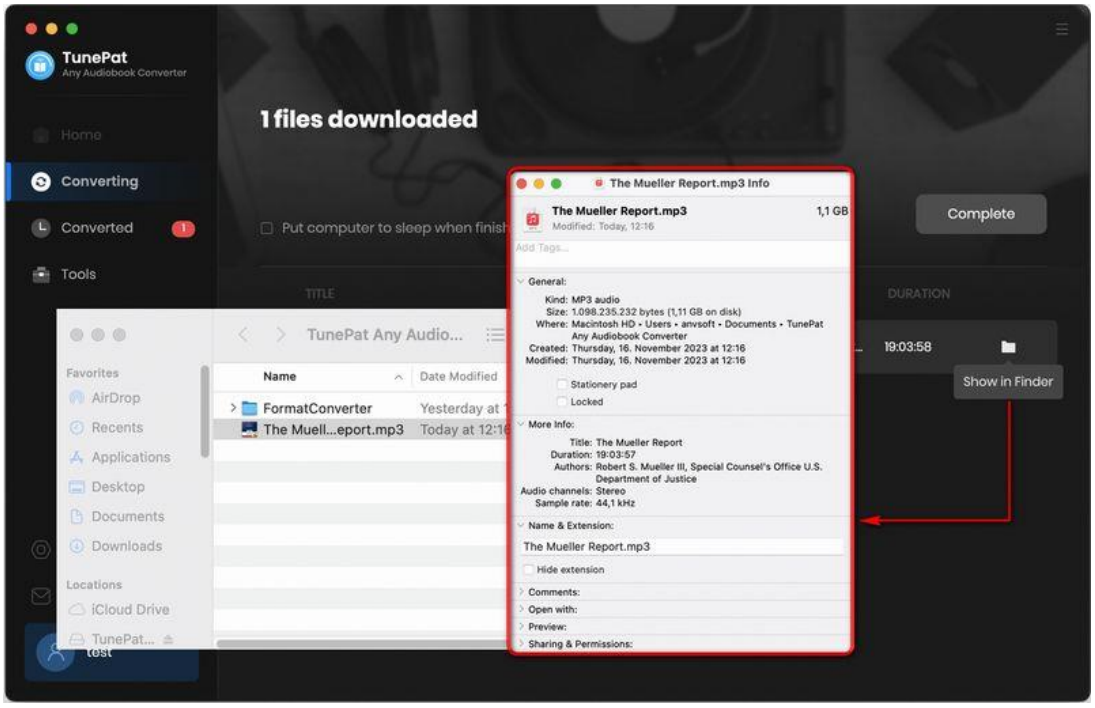
Step 4: Convert Audiobooks to M4A/M4B/MP3

Return to the Home page, where previously selected audiobooks are displayed. For batch selection of additional audiobooks for simultaneous conversion, utilize the "**Add More**" button to access the Audible Online Library. After adding all desired titles, click "**Convert**" to commence the process.

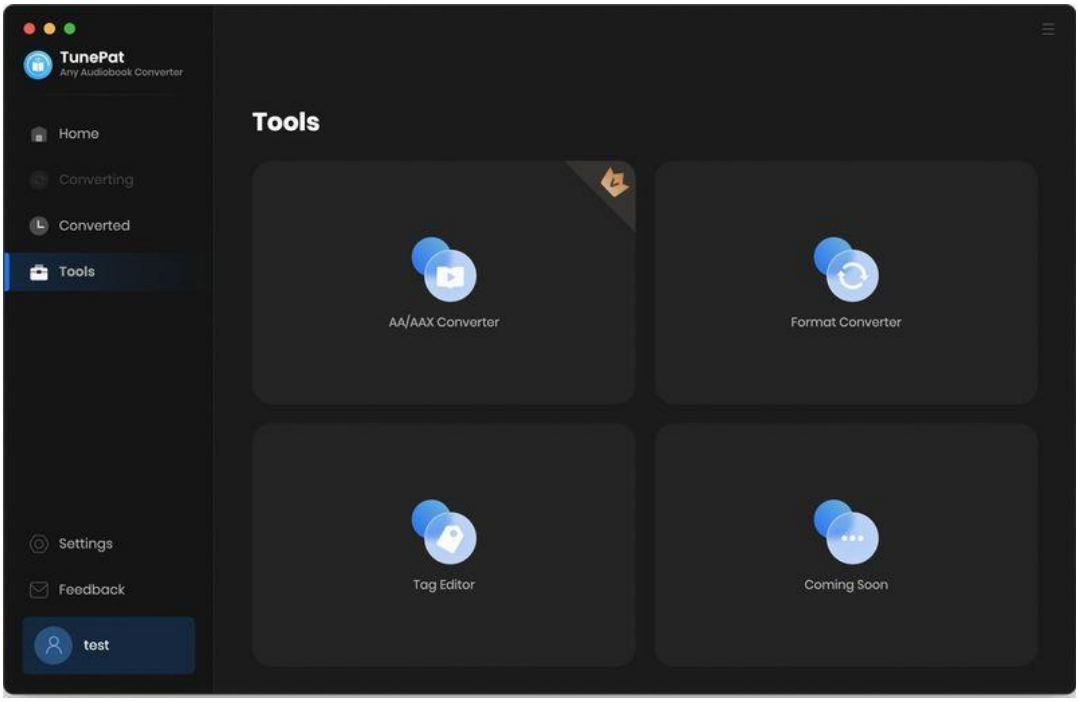


Step 5: View the Converted Audible Audiobooks

Upon completion, use the "**Show in Finder**" button to locate the converted audiobook's local destination on your Mac, or navigate to the "**Converted**" module to browse and double-click files for playback.



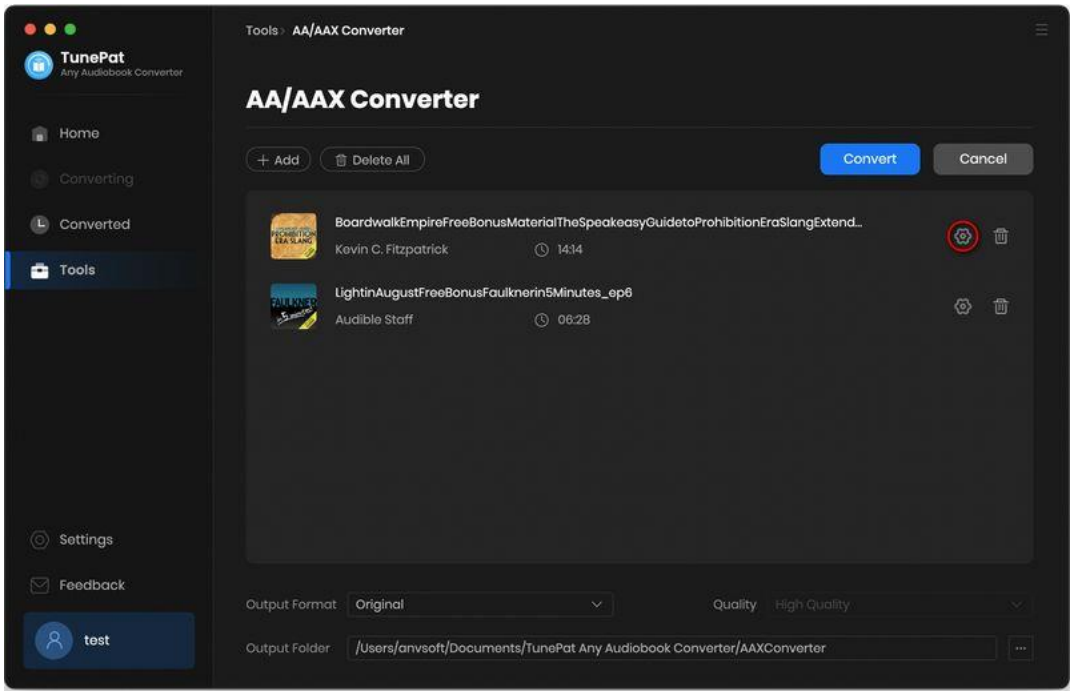
Handy Tools: AA/AAX Converter, Format Converter & Tag Editor



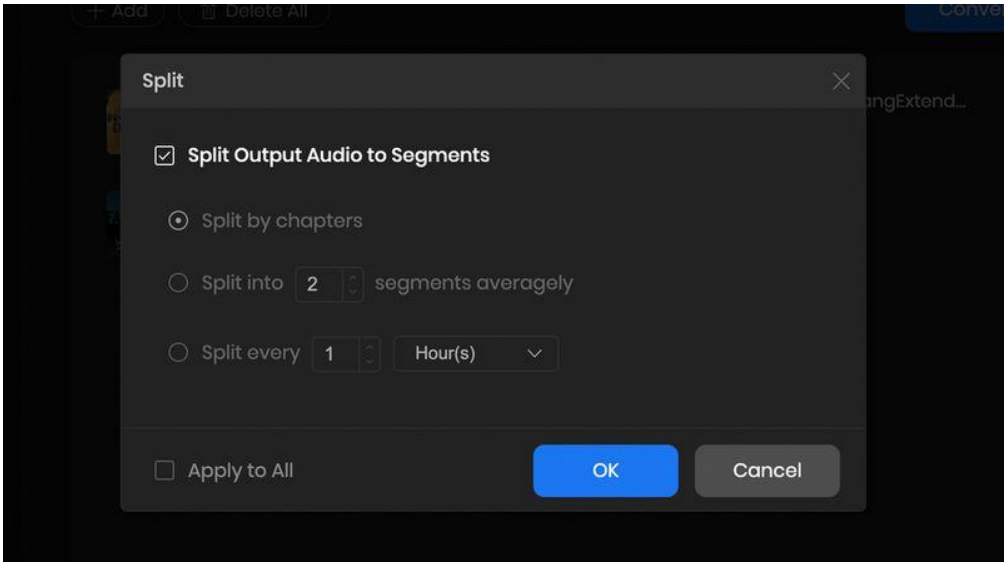
#1: AA/AAX Converter

The purchased Audiobooks can be downloaded in the AA or AAX format for offline playback. However, it's essential to note that many audio players do not support these formats, limiting usage to Audible or specific audiobook players. To address this issue, TunePat offers an AA/AAX Converter. This tool allows users to convert audiobooks into commonly used audio formats. Please be aware that this tool requires membership registration with TunePat for activation.

When using this converter, you need to download your purchased audiobooks locally. Then, click "**+ Add**" to import them into TunePat from your Mac. Multiple audiobooks can be selected simultaneously. If you have a need to split audiobooks, click the "**Settings**" icon next to any title for advanced options. You can choose to split the audiobooks by chapters, evenly divide them into X parts, or segment every X minutes or hours. After configuring the settings, click "**Convert**" to initiate the conversion process.

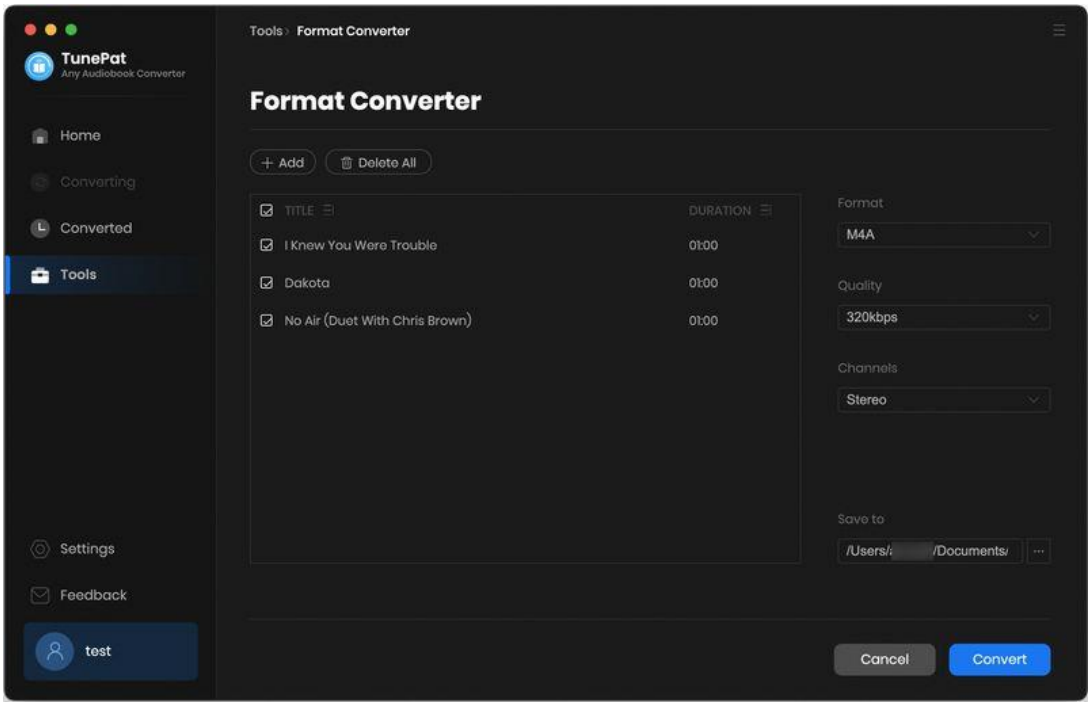


TIPS: Use the "**Apply to All**" button to quickly apply current settings to multiple audiobook files added simultaneously, avoiding the need to set them individually.



#2: Format Converter

The Format Converter allows users to convert audio files on their computer to MP3, M4A, FLAC, WAV, OGG, and AIFF formats. Additionally, users can customize audio quality, channels, and save paths. Simply click the "**+ Add**" option to import audio files, configure settings, and click "**Convert**" to get the files to your Mac computer.



#3: Tag Editor

In this section, users can modify the tag information of local audio files. You can edit artwork, title, artist, album, genre, year, and track number. Click the "**+ Add**" button to import the files you want to edit. After making the necessary changes, click the "**Save**" button.
